

NaturZone Wins University of Tampa Sustainable Business Award!

Tampa Florida, June 3, 2015- Andrew Longfellow accepts the Sustainable Business Award on behalf of NaturZone Pest Control. NaturZone was recognized as one of bay area companies leading the commitment to social, economic and environmental responsibility.

Now in their 7th year, the Sustainable Business Awards, sponsored by the Sustany Foundation, recognize and honor for-profit businesses in the Tampa Bay Area that engage in practices that increase economic opportunities and improve the environment and community. Businesses will be recognized for contributions in building a sustainable economy in Tampa Bay, while embracing the “Triple Bottom Line” — advancing the interests of People, Planet & Profit through innovative practices, products and services. University of Tampa MBA students, under the guidance of UT faculty at the Sykes College of Business, developed an evaluation process based primarily on Global Reporting Initiative guidelines. Nominated businesses were evaluated by MBA students, who made recommendations to the Sustainable Business Coalition for the Award.
